

GHS Hazard Pictograms — OSHA Hazard Communication (29 CFR 1910.1200)

Hazards each pictogram covers, as listed on OSHA QuickCard 3491-08R (2024). Dashed box = not required by OSHA.

Health Hazard

Carcinogen
Mutagenicity
Reproductive toxicity
Respiratory sensitizer
Target organ toxicity
Aspiration toxicity

Flame

Flammables
Pyrophorics
Self-heating
Emits flammable gas
Self-reactives
Organic peroxides
Desensitized explosives

Exclamation Mark

Irritant (skin and eye)
Skin sensitizer
Acute toxicity (harmful)
Narcotic effects
Respiratory tract irritant
Hazard not otherwise classified (non-mandatory)
Hazardous to ozone layer (non-mandatory)

Gas Cylinder

Gases under pressure
Chemicals under pressure

Corrosion

Skin corrosion / burns
Eye damage
Corrosive to metals

Exploding Bomb

Explosives
Self-reactives
Organic peroxides

Flame Over Circle

Oxidizers

Skull and Crossbones

Acute toxicity (fatal or toxic)

Environment

NOT REQUIRED BY OSHA

Aquatic toxicity

Label rules (29 CFR 1910.1200, Appendix C): a pictogram is a black symbol on a white background in a red square set on a point; a red frame with no symbol is not allowed (C.2.3.1). Each pictogram appears only once on a label (C.2.3.4). If the skull and crossbones is used, the exclamation mark is not used for acute toxicity; if corrosion is used, the exclamation mark is not used for skin or eye irritation; if the health hazard is used for respiratory sensitization, the exclamation mark is not used for skin sensitization or skin or eye irritation (C.2.1). Always check Section 2 of the product's SDS for its actual classification. · Free chart from SDSentry — sdsentry.0xpi.com/guides/ghs-pictograms-chart.html
